

SPENCER FLETCHER

+1 (351)-209-8432 ♦ spencer@spencerfletcher.com ♦ spencerfletcher.com ♦ in/spencer-fletcher-dev

US citizen & UBC computer science graduate with experience in low-latency distributed systems, compiler tooling, and full-stack web development using Python, C/C++, TypeScript/JavaScript, AWS, Linux, and PostgreSQL.

EDUCATION

University of British Columbia, Computer Science, GPA 3.85/4.0 (Major GPA 3.9) Aug 2022 - May 2026
Outstanding International Student (OIS) Award
Relevant coursework: Algorithm Design & Analysis, Operating Systems, Databases, Artificial Intelligence

University of Rochester, Computer Science, GPA 3.8/4.0 (Major GPA 4.0), Dean's List Sep 2021 - May 2022

SELECTED PROJECTS

Automated Market-Making Engine | github.com/spencerfletcher/market-maker Mar 2026 - Present

- Built and operate a Python market-making engine on AWS for Polymarket US, filling 154k+ contracts across \$77k+ in gross notional over seven weeks with live capital, backed by a 12k+ automated test suite.
- Used AI coding agents (Claude Code) to accelerate implementation and testing, while independently validating venue behavior and building tooling to reconcile uncertain local state against exchange state.
- Reduced warm REST API round-trip latency from 74 ms to 14 ms through persistent connections and in-region AWS deployment; used concurrent WebSocket feeds for real-time market data.

Fork – Recipe Versioning Platform | github.com/spencerfletcher/Fork Oct 2025 - Present

- Built and deployed a full-stack SvelteKit/PostgreSQL recipe platform on Netlify with versioned ingredients and instructions, structured diffs, public/private recipes, and attributed variations.
- Added Drizzle migrations, Supabase row-level security, and CI checks to improve production reliability.

MemoryGuard | github.com/spencerfletcher/MemoryGuard Mar 2024

- Co-developed a Clang/LLVM dynamic analysis tool in a four-person team, combining AST instrumentation with runtime heap tracking to detect memory leaks and use-after-free in C.
- Implemented runtime use-after-free detection for aliased heap pointers using a shadow memory map and reviewed teammates' changes across the project.

WORK EXPERIENCE

Bar Manager | Just Another Cafe - Vancouver, BC Oct 2025 - Present

- Overhauled the cocktail, wine, and food program; dinner-service food and beverage revenue increased 30%.
- Oversee daily operations, vendor relationships, menu development, and inventory at a 15-person venue.

Freelance Developer | Hollywood Theatre - Vancouver, BC Mar 2024 - Apr 2025

- Wrote a Google Apps Script tip-splitting workflow, saving ~5 hours of manual work weekly.
- Created a JavaScript marquee letter tracker, saving ~2 hours weekly.

Student Developer & IT Intern | University of British Columbia - Vancouver, BC Sep 2022 - Apr 2023

- Rebuilt Body Donation Program website via WordPress/JS; donations more than doubled after launch.
- Automated Linux server backups with Bash/cron and used system logs to diagnose server and storage issues.

SKILLS

Programming: Python, C++, C, TypeScript, JavaScript, Java, Assembly, Erlang, R

Web/Data: SvelteKit, React, Node.js, PostgreSQL, Supabase, REST APIs, WebSockets

Tools: Claude Code, Linux, AWS, Git, Docker, CI/CD, Clang/LLVM, Playwright, Vitest, pytest, Netlify
